Sesotho

PROFILE

I have a keen eye for digital presentation and a strong focus on visual design. I believe that visual design has the power to attract, inspire, create desire, and motivate people to respond to a message in a way that can make a lasting impact.

Using my skills in HTML, CSS, and JavaScript, I strive to create pixel-perfect designs that not only look great but also effectively communicate the intended message. Whether it's a website, a landing page, or an app interface, I always strive to deliver a design that leaves a positive impression on the user and helps them achieve their goals

----

PROFESSIONAL EXPERIENCE

Designer | Developer

InHouse Web Designer   2023-Current

- Collaborated with UX/UI designers to create wireframes, mockups, and prototypes.
- Ensured a consistent and engaging user experience through design concepts.

- Wrote semantic HTML5 markup for web pages.
- Applied CSS styles to achieve desired visual appearance.
- Ensured websites were responsive across various devices and screen sizes.
- Implemented media queries and responsive design techniques.
- Enhanced user interactivity with forms, navigation menus, and animations.
- Cross-Browser Compatibility:
- Ensured compatibility and visual consistency across different web browsers and versions.
- Performance Optimization:
- Optimized front-end code for fast loading times.

WordPress Developer

Afrozaar   2022-2023

- Create custom WordPress themes from scratch or modify existing themes to meet project requirements.
- Ensure the theme is responsive and compatible with various devices and browsers.
- Develop and maintain the HTML and CSS code for the WordPress theme.
- Ensure clean and semantic HTML5 markup and CSS styles for proper presentation and styling.
- Write PHP code to implement theme functionality, including template files, custom post types, and custom fields.
- Create theme-specific functions and hooks for customization.
- Incorporate core WordPress features, such as menus, widgets, and customizer options, into the theme.
- Implement dynamic content using WordPress functions and template tags.
- Customize and style the theme based on design mockups and client requirements.
- Implement custom design elements, typography, and color schemes.
- Follow WordPress security best practices to secure the theme against vulnerabilities.
- Test the theme thoroughly across different web browsers and devices to ensure consistent functionality and appearance.
-   - Ensure accessible and intuitive user interfaces.
-   Create documentation for the theme, including instructions for installation, configuration, and customization.
- Utilize version control systems (e.g., Git) to manage theme code and collaborate with team members.

Web Designer | Developer

Bsure Group   2020-2022

- Translated UI/UX design mockups and wireframes into functional web interfaces.
- Ensured the design's visual integrity and consistency in the final product.
- Developed and maintained HTML/CSS code to create the structure and styling of web pages.
- Applied CSS styles to achieve the desired layout and visual presentation.
- Implemented interactive features and functionality using JavaScript.
- Collaborated with designers to ensure seamless integration of JavaScript-based animations and interactions.
- Ensured that web applications and sites were responsive and adapted well to different screen sizes and devices.
- Utilized media queries and responsive design techniques.
- Tested and fixed issues to ensure the website or application functioned correctly and looked consistent across various web browsers and versions.
- Utilized version control systems like Git to manage code changes and collaborate with other developers on the team.

Web Designer | Developer

Big Link SA   2018-2020
